This game on steam do not work. I purchase it and haven't play a single game.. The military system is sucked, far worse than CIII. The nearest legion will dispatch to get easily killed by the enemy troop and you can't control anything. At the end of every battle, there were glitches which are very annoying.

The residence will ask for city wall despite how many wall and tower were built.

The game rationale is odd. Some city of begining tier are much more difficult than the latter.

Limitation of trading (esp. export) make the game lose its charm.

Visual was drastically improved with error in zooming in and out.. A pretty hard but fun game.. Great game for passing time, while drinking vodka also.

10/10 would drink vodka again. This is a really fun game to play with friends and family alike. I love it.. i like roleplaying in this game like kyle likes roleplaying with sam. My speed running record is 53 seconds, and even that is slow!

Beat the game twice, and then refunded with only 4 minutes of playtime!

(I had to open the game and wait a minute to post this review). Really beautiful puzzle game. Challenging, but not so much so you get trapped forever. Lovely art style, simple concept but doesn't get old.

My only critique is that it's a little too simple. It's released for iOS and I see why. It feels like an app. Which is totally fine, but if you're looking for a puzzles game that's more than just a series of obstacles, this isn't it.

It's a straightforward platformer. Enjoyable, difficult, and very pretty.

Nice series of a small documentaries about indie game makers participating in a 48 hour game jam.

The five part series gives you overthe shoulder look into different ways of trouble solving and creative workflows of five two person teams under tight deadline to create something playable.. I was surprised by this game. At first glance I thought it would just be a cheap Call of Duty knockoff, but it has some polish. The HUD was simple and helpful, the objectives were clear and sensible, and the drone control systems were simple yet fun. All in all a solid FPS. Would play again.. 10/10 best game of my childhood

Pros :

Fun

Tactical af

Genuinely good storyline

Good soundtrack for the time

Cons :

Can be a bit tedious as there are only 20 odd missions and the multiplayer doesn't work

The sewer failure cutscene is wrong

The original built in mod menu doesn't come with it. ehhhh. I liked the idea, but there's so little actual game. It feels over in 10 minutes and I have very little interest in replaying to find out the 'true' goings on.. Fun questions but it is not good that they changed it so there is 5000 achievements. That removes all the seriousness in the game and that is just sad to see.. Solid mechanics and I love the the arcade ideas. So fun to play pingpong without need to pick up the ball.. "I'm Commander Shepard, and this is my favourite game on the Citadel!". This isn't a bad game. It's a functional port of a browser game that certainly has the potential to be worth a few dollars. Unfortunately, it should really be labeled as early access. The latest patch just highlights how much more the developers wanted to accomplish, and how far short the product is from finished. Along with the balance and interface issues, I just can't recommend this game. Maybe in a few patches I'll change my mind, but right now I'm too frustrated thinking I bought a finished product only to realize how far from complete the game actually is.
